EMPLOYMENT

Full stack developer(Ruby, Elixir, React)	**Blocks(Politech)**	**2021 – 2023**

· Transitioned a major Rails application to Elixir, improving performance and scalability. Developed key features, including a real-time phone banking system, contributing to cutting-edge voter registration and organizing tools.

Team lead	**Stakester**	**2019 – 2021**

· As Team Lead, orchestrated the rewrite of both the API and mobile app for a gaming platform, focusing on optimizing speed and reliability. Leveraged Ruby, Elixir, and React Native to enhance the user experience, achieving a more responsive and stable environment that aligned with the platform's performance goals

Founder(CEO)	**Spacelab**	**2018-2021**

· At Spacelab, I founded a thriving digital agency that grew to employ over 20 professionals.
  As a pivotal figure in the company's trajectory, I led multiple teams, ensuring consistent delivery of high-quality results.

Backend Developer	**Arcade City**	**2016 - 2018**

· Architected and developed API for peer-to-peer ride sharing app based on cryptocurrencies using Elixir, which was used by multiple platforms

Senior Mobile Developer	**Digital Clipboard**	**2015 - 2016**

· Developed a cross-platform AI based mobile application for wealth, insurance and mortgage advisors

CTO	**Airhelp**	**2013 - 2014**

· Online service that enabled users to claim compensation for their flight delays, managed team of 4 engineers, and let project from start to the first release in 5 months.

Lead Software Engineer	**Ministry of Health, Labour and Social Affairs of Georgia**	**2011 – 2013**

· Developed tools to import insurance data from different sources and formats, which improved data collection efficiency and speed dramatically.
· Worked on big data processing pipelines to give feedback for insurance requests in almost real time
